FLORIDA NOTICE OF LOSS CONTROL SERVICES

Pursuant to Florida Administrative Code (“FAC”) 69O-166.040, we would like to inform you of the risk management programs that we have developed and that are available to you.

For your consideration, we offer the services of AIG Consultants, Inc., an AIG member company. AIG Consultants is a professional risk management company with more than 25 years experience and expertise in assisting with the prevention and mitigation of losses. AIG Consultants can help address a range of problems related to loss control in various lines of business. Certain risk management programs are available to you, free of charge, as part of your commercial insurance coverage; contact your insurance broker for more details on these plans. Other, more substantive risk management programs can be purchased which include, but are not limited to the following services: surveys/analysis for identifying exposures related to your specific operations, safety management training and counseling for your staff, adoption of relevant testing strategies, and evaluations of current loss control practices.

Upon your written request, we could provide you with specific guidelines for risk management programs as established by FAC 69O-166.040. Such guidelines would provide instructions and offer basic criteria to assist you in creating your own risk management plan. Should you request such guidelines and, subsequently, wish to further explore the purchase of a risk management plan, developed by AIG Consultants, which is specific to your company’s needs, we would be willing to discuss with you both the availability of such a plan, and if available, its specific content and cost.

Again, we welcome all inquiries regarding the services of AIG Consultants, Inc.
