ALIR Changes - January 1, 2007

Several changes will take place in January that all users should be aware of. These changes are outlined below.

COLORADO REPORTING

Effective January 1, 2007, the Colorado Department of Revenue – Motor Vehicle Division (MVD) has declared that the reporting of Proof of Coverage to the state of Colorado will be optional for commercial insurance. AIG will not exercise this option and will terminate the practice of reporting commercial Proof of Coverage in Colorado, effective January 1, 2007. Accordingly, the Colorado template has been removed from the AccessAIG website.

Please refer to the attachment [Co MIIDB CommExemptionNtc.pdf](#) for a detailed discussion of how Colorado will identify commercial use vehicles. We recommend for commercial Proof of Coverage purposes to issue all ID cards with the notation Commercially Insured to avoid any identification problems.

GEORGIA REPORTING

We want to clarify the Georgia commercial reporting requirements. If the policy meets the fleet definition of the Georgia statute establishing proof of coverage reporting, i.e. a commercial policy having 2 or more vehicles, proof of coverage reporting IS NOT NECESSARY. When issuing a policy that meets this definition of fleet, we recommend for Proof of Coverage purposes to issue all ID cards with the notation Fleet to avoid any identification problems.

PURGE OF INACTIVE USER ID ACCOUNTS

Please note that beginning in late January, AIG Security will be implementing a tighter control on User ID accounts by disabling them if they have been inactive for a period of 60 days. Currently an account is disabled if inactive for 180 days. In the event your account is disabled and you still require it to be active, send an email to the DMV Support Unit at dmvdataentry@aig.com to request reactivation of your account

If you have any questions, please contact your Program Manager.

Colorado Motorist Insurance Identification Database (MIIDB) Commercially Insured Vehicle Filing Exemption

Effective on January 1st, 2007, it will be optional for commercial insurance providers to report commercial insurance information to the Colorado MIIDB. If commercial insurance coverage information is provided to the new MIIDB, the system will be able to manage the data, but sending the data is not requisite.

When a vehicle has any of the following plate types, the vehicle will automatically be flagged as exempt. Section 6 of the MIIDB Rules state:

“The Designated Agent [Colorado.gov] is authorized to mark these vehicles as exempt from tracking insurance information under the MIIDB. These plate types are:

- i. Buses: the first three characters of the plate type field are BUS.
 - ii. Dealers: the first three characters of the plate type field are DLR.
 - iii. Farm Vehicles: the first three characters of the plate type field are FTK or FTR.
 - iv. Special Mobile Equipment: the first three characters of the plate type field are SME.
 - v. Special Mobile Machinery: the first three characters of the plate type field are SMM.
 - vi. Special Use Vehicle: the first three characters of the plate type field are SVW.
 - vii. Trailers: the first three characters of the plate type field are TRL.
 - viii. Truck Tractor: the first three characters of the plate type field are TTR.
 - ix. Gross Vehicle Weight: the first three characters of the plate type field are GVW.
- b. The following will also be exempt if the last three characters of the plate type field are:
- i. FLT (Fleet),
 - ii. CNY (County)
 - iii. CTY (City)
 - iv. RNT RTL (rental)
 - v. SOC (State of Colorado)
 - vi. CCL (TV/radio)
 - vii. GVT (Government)”

If the vehicle does not have one of these plate types it is imperative to show “Proof of Insurance” at the time of vehicle registration that clearly states the vehicle is “COMMERCIALLY INSURED” in order to receive the exemption “from tracking insurance information”. Commercial insurers should notify their insured’s to let the County Clerk know, at the time they register their vehicle, that the vehicle is used commercially. The Clerk will then mark the record so that the vehicle will be declared exempt from MIIDB tracking. This does not mean that a vehicle is not required to have insurance by law. The Rules state:

- c. “In addition, a “C” in the Carrier Type field on any plate indicates the vehicle is used for commercial purposes and will be marked exempt.”

For security reasons, the web interface that is currently available to the insurance industry, which allows a search of vehicle records in order to mark a record as commercially exempt, will no longer be available beginning January 1st, 2007. The elimination of this web site makes the importance of marking a vehicle as a commercial use vehicle, at the time of registration, of greater importance than it has been previously.
