Re: Division 66 - 2014 Social Services AFC US Profitability Study

I. Executive Summary

A. <u>Introduction</u> -

The Social Services AFC program provides coverage for Non-Profit and For-Profit social service agencies. This includes accounts such as developmentally disabled, mental and behavioral health, adult day care, addiction treatment, and shelters.

Last year's analysis resulted in an overall PY 2014 Ultimate Loss Ratio indication of 65.4% which yielded a RAP neutral rate need of 2.3% based on 2013 RAP values.

The year to date rate change for 2014 is 7.5% for all lines of business.

B. Summary of Results

IL and LAE evaluated as of: 2^{nd} Quarter 2014

Currency Employed: <u>USD</u>

Exhibit 1:

			2014	Projected		RAP		
			Budgeted	Ultimate		Breakeven		
Line of	Sub-	Policy	GWP	IL and LAE	Combined	Target	RAP Rate	Projected
Business	Segment	Year	(000)	Ratio*	Ratio*	Combined Ratio	Need	RAP \$ **
GL	N/A	2014	3,521	62.8%	96.4%	98.0%	-2.4%	37
AL	N/A	2014	966	67.0%	100.7%	97.8%	4.5%	(14)
Property	N/A	2014	2,107	48.1%	81.7%	92.1%	-16.9%	155
APD	N/A	2014	128	75.0%	105.6%	97.0%	12.3%	(7)
Excess Liability	N/A	2014	649	61.4%	93.4%	98.0%	-6.6%	20
TOTAL			7,371	59.2%	92.7%	96.3%	-5.5%	190

^{*} Includes PY 2014 rate change achieved

Discussion of Material Findings—The Casualty segment in total is roughly running at RAP positive. This is the first time it's been at this level since program inception. This improvement is largely due to the significant rate achieved in recent policy years. No significant shifts in frequency and severity trends were observed for this program. For the purposes of this study, Assisted Living accounts were analyzed separately. This type of business was deemed not representative of the typical exposure in the current book of business and has been non-renewed. An adjustment to selected ultimate loss ratio was made when applicable. Property has become more profitable on a RAP breakeven basis. Property had an 8.2% decrease in the AAL from the prior study, which is in line with the June 2013 underwriting initiative to limit CAT exposure. All other lines of business remain in line with expectations.

^{**} Assumes a tax rate of 35%

II. Assumptions/Limitations/Data Quality/Other

- A. <u>Assumptions</u> For purposes of this analysis, the loss ratio indications are based on a 3.5% trend assumption for GL, 4% for AL, 5% for XS and 0.0% for Property and APD.
- B. <u>Limitations/Weakness</u> The projected PY 2014 loss ratio shown in Exhibit 1 of this report assumes that the YTD rate change achieved in 2014 will be consistent throughout the remainder of the year. To the extent that the annual rate change does not equal the YTD rate change, then the results of this report will vary. Besides that, there are no significant limitations/weaknesses with regards to this study outside of standard actuarial caveats that normally apply to projecting future losses. These include, but are not limited to, actual emerged actuarial parameters (LDF's, ILFs, ELR's, trend, etc.) not being in line with selected parameters; misscoding/inaccurate representation of the data relied upon in this analysis; and future regulatory/judicial changes affecting the frequency/severity of the results.

<u>Data Quality</u> - The data for all lines of business in this analysis is pulled from Sandbox which aggregates the data from CRS.

C. Other - Assisted Living accounts were analyzed separately and were determined to have a significant impact on GL and Property. These exposures are not representative of the current book of business.

III. Methodology

A review of several claim diagnostics shows no clear evidence of case reserve strengthening for this book of business (no consistent increase in average outstanding or decrease in paid to incurred ratios). In addition, a review of implied claim disposal rate does not show any clear evidence of claims closure rate changes.

Several methodologies have been used to project loss & legal expenses to ultimate. This includes the following: paid and incurred loss development and Bornhuetter-Ferguson methods (on a paid and incurred basis) all for losses uncapped and at varying capped levels. Frequency and severity is employed along with ultimate ILAE ratio selections to select a final PY 2014 ultimate loss ratio. The selected frequency and severities are somewhat consistent in comparison to the prior profit study.

The commissions and underwriting expenses are program specific. The RAP neutral ratio is calculated based program specific RAP profit loads. Rate need is based on a ratio of the ultimate ILAE ratio and the target ILAE ratio.

- IV. Actuarial Next Steps We will continue to monitor these results through quarterly actual versus expected analyses.
- V. Underwriting Action Plans Below is the response provided by Roberta Condell from an email dated 8/30/14.

The program focus since 2003 has been Social Service classes, with emphasis on Developmentally Disabled, in the following states: NY, NJ, PA, MI & OH. In 2009, child care centers were added for all states. In August of 2013, we expanded the program to the remaining 50 states, excluding cat prone states: AK, FL, HI, LA & TX.

The profitability of the book was negatively influenced from 2008-2010 due to losses from a segment of NY Assisted Living business. This class of business is no longer written and the business is now off the books. The impact of these changes shown in the 2014 Profit Study resulted in an improved combined ratio of 92.7%, continued improvement from the 2013 C/R of 98.4% Profit Study Results.

2014 Achievements:

- Beginning in August 2013, AFC began transitioning their QBE Social Services book with a more favorable historical
 loss ratio and this was completed July 2014 with 100% Renewal Retention and produced a total WP of \$2.8M.
 Throughout the transition, AFC was able to maintain an overall average rate achievement of 12% for the QBE
 accounts.
- We expect growth for 2014. AFC finished 2013 at \$5.3M and 2014 YTD WP is \$5.9M, which includes \$1.2M from QBE; expected plan is to finish 2014 at \$7.4M or 37% ahead of 2013 Actual WP.

Appendix - Methodology:

Please note that the analysis has seven sections:

Section I - General Liability

Section II - Auto Liability

Section III - Property

Section IV - Auto Physical Damage

Section V - Excess

Exhibit 1 - Summarizes PY 2014 ultimate ILAE ratios and PY 2014 rate need.

Exhibit 2 - PY reported incurred and paid loss and LAE ratios in triangle format.

Exhibit 3 - Indexing PY 2004 - 2014 ultimate ILAE (incurred + LAE) ratios to PY 2014 and selection of PY 2014 ultimate ILAE ratios.

Exhibit 4 - Frequency/Severity method used to calculate an indicated PY 2014 ultimate ILAE ratio

Exhibit 5 - Summarizes various methods (Exhibit 6a - Exhibit 8f) used to calculate ultimate + LAE & ratios for PY's 2004 - 2014.

- a) Policy Limits
- b) Capped at \$250,000
- c) Capped at \$100,000

Exhibit 6 - Bornhuetter-Ferguson methods

- a) Methodology
- b) A Priori Loss Ratios

Exhibit 7 - ILF selections

<u>Exhibit 8</u> - Loss development methods. In general, the selected age to age loss development factors are determined by giving weight to the overall Division 66 loss development factors as well as historical results of the program.

- a) Uncapped Incurred
- b) Incurred Capped at \$250,000
- c) Incurred Capped at \$100,000
- d) Uncapped Paid
- e) Paid Capped at \$250,000
- f) Paid Capped at \$100,000

<u>Exhibit 9</u> - Gross Written Premium developed to an ultimate PY basis. In general, the selected age to age premium development factors are determined by giving weight to the overall Division 66 premium development factors as well as the historical results of the program.

<u>Exhibit 10</u> - Total claim counts (excluding closed w/no-pay) developed to ultimate. In general, the selected age to age loss development factors are determined by giving weight to the overall Division 66 claim development factors as well as the historical results of the program.

<u>Exhibit 11</u> - Open claim count, closed with payment claim count, closed without payment claim count and total claim count development.

Exhibits 12 - Key diagnostic triangles.

a) Case Reserves per Open Claim

Paid & Legal per Closed With Payment

Paid per Closed With Payment

b) Paid & Legal to Incurred & Legal

Paid to Incurred

Closed W/Pay to Total Claim Count (Ex CWNP)

- c) Legal to Indemnity
- d) Total Claim Count to Total Policy Count

Average Account Size - Total - GWP to Total Policy Count

Average Account Size - New- GWP to New Policy Count

Average Account Size - Renewal - GWP to Renewal Policy Count

Exhibit 13 - Large loss listing (Incurred + LAE > \$100,000 and >\$250,000 for Excess).

Please let me know if you have any questions or comments regarding this study.
