IMPORTANT NOTICE FOR USERS OF ISO PRODUCTS AND SERVICES

Please make sure that your company has authorized your use of this product and has complied with the requirements applicable in the jurisdiction where you plan to use it.

We distribute both state-specific and multi-state products and services. We do not distribute all the multi-state products and services for use in every jurisdiction due to corporate policy, regulatory preference, or variations or lack of clarity in state laws.

We provide participating insurers with information concerning the jurisdictions for which our products and services are distributed. Even in those jurisdictions, each insurer must determine what filing requirements, if any, apply and whether those requirements have been satisfied.

Now, as in the past, all of our products and services are advisory, and are made available for optional use by participating insurers as a matter of individual choice. Your company must decide for itself which, if any, ISO products or services are needed or useful to its operation and how those selected for use should be applied. We urge that you be guided by the advice of your attorneys on the legal requirements.

Types Of ZIP Codes

ZIP codes can be divided into two types:

- ◆ **Boundary ZIP codes:** ZIP codes with residential delivery of mail that have a defined boundary. Most ZIP codes fall into this category.
- ◆ **Point ZIP codes:** ZIP codes that are either post offices with Post Office (PO) boxes or unique ZIP codes that contain just one building or organization. There are two types of point ZIP codes:
 - **Residential Post Office (RPO) point ZIP codes:** point ZIP codes having mostly residential post office box customers. In many cases, these ZIP codes are located in areas where there is no delivery of mail, and residents must pick up their mail from their PO box at the post office.
 - **Non-RPO point ZIP codes:** all point ZIP codes not considered RPO. These ZIP codes may contain some residential customers.

Under ISO's ZIP code-based territory definitions, all valid United States Postal Service (USPS) ZIP codes applicable in a state are to be included in the territory definitions. These include both "boundary" ZIP codes and "point" (both RPO and non-RPO) ZIP codes.

ISO determines a ZIP code's type based on information purchased from the vendor Tele Atlas (formerly known as Geographic Data Technology). Tele Atlas bases their product on information received from the USPS.

ZIP Code Changes: Effect On Territory Definitions

ZIP CODE CHANGE	EFFECT ON TERRITORY DEFINITIONS
New ZIP code created	<p>Boundary ZIP code: The new ZIP code will be assigned to the territory of the previous ZIP code that contributed the most area to the new boundary ZIP code.</p> <p>Point ZIP code: The new ZIP code will be assigned to the territory definitions of its enclosing boundary ZIP code.</p>
ZIP code deleted	The ZIP code will be deleted from the territory definitions.
A boundary ZIP code changes to a point ZIP code	The ZIP code will be assigned the territory definition of its revised enclosing ZIP code.
A point ZIP code changes to a boundary ZIP code	The ZIP code will be assigned to the territory definition of the previous ZIP code that contributed the most area to the newly classified boundary ZIP code.
A boundary ZIP code whose boundary changes in such a manner that most of the area inside its revised boundary came from a previous ZIP code which is in a different territory	<p>The ZIP code will be assigned the territory definition of the previous ZIP code.</p> <p>Any point ZIP code within those boundary ZIP codes will be reassigned in the same manner.</p>
A point ZIP code (1) that moves inside a different enclosing ZIP code, and (2) whose revised enclosing ZIP code's territory assignment is different than the previous enclosing ZIP code's territory assignment	The ZIP code will be assigned to the territory of the revised enclosing ZIP code.
