INTRODUCTION OF NEW SPLIT PUBLIC PROTECTION CODES FOR IDAHO – EFFECTIVE DATE AMENDED

KEY MESSAGE

This circular announces the amendment of the previously established effective date in support of ISO's introduction of New Split Public Protection codes for the state of Idaho.

INTRODUCTION

On September 11, 2018 we released circular [SP-AG-2018-001](#) et al., announcing the Introduction of new Split Public Protection Codes for the state of Idaho. When announcing this change, we inadvertently indicated that the Statistical Reporting Effective date would have an inception date of August 1, 2018 on an optional basis and of April 1, 2019 on a mandatory basis.

ISO ACTION

As a result, we are announcing a new effective date of August 1, 2019 which corresponds to the effective date that was established by the Idaho Surveying and Rating Bureau (ISRB).

COMMENT(S)

This revision applies to CSP, CSP-I, PLSP (OTA) and PLSAP (OTA).

STATISTICAL REPORTING EFFECTIVE DATE

For statistical reporting purposes, these changes are effective for all transactions with an inception date of August 1, 2019 and subsequent.

FUTURE ISO ACTION

We will include this change in the:

- Fourth Quarter 2018 release of the Commercial Lines Company Edit Package (CEP).
- Fourth Quarter 2018 release of the Personal Lines Company Edit Package (CEP).

NOTE: To monitor the status of quarterly statistical plan and Company Edit Package (CEP) updates, view Statistical Plans and Related Information and Statistical Web Services. These links will provide information on the most recent quarterly releases, anticipated release dates of forthcoming plan and edit package updates, as well as other pertinent statistical reporting information. You may also sign up for our Statistical Plan Alert feature, which will automatically inform you via email when any of our plans are updated. Please see the ISOnet Statistical Plans homepage for details.

IMPORTANT NOTE(S)

Companies implementing these changes before they are reflected in the Company Edit Package (CEP) and Receipt and Acceptance edits may:

- Use the "Accept Feature" of the CEP for records flagged in error after all other errors are corrected; and/or
- Request the "Accept Option" to reprocess records flagged in error by ISO due to the use of new codes.

Please retain the revised statistical plan pages attached to this circular, and keep them readily accessible, as these pages will not be incorporated into the plan until Fourth Quarter 2018 release of the updated CSP, CSP-I, PLSP(OTA) and PLSAP(OTA) pages.
