

Slip, Trip, and Fall Prevention: Housekeeping

Good housekeeping is more than an industry best practice; it helps reduce the chances of slips, trips, or falls. This handout is designed to address housekeeping practices that, by themselves, may seem inconsequential, but, together, form a comprehensive slip, trip, and fall risk control program.

The majority of slips result from foreign matter on flooring materials. Posting signs (e.g., "Wet - Slippery Floor"), reporting unusual conditions, and knowing what to do when there is a spill are essential housekeeping tasks for an effective risk control program. Good housekeeping reduces the chance of a slip or fall at a facility. Before allocating funds to replace flooring or purchasing materials to reduce slips, trips, or falls, it is prudent to review housekeeping operations. Overlooking the details of reading labels or not having spill control kits available can increase chances of slip and fall injuries. Read on to consider housekeeping best practices designed to minimize the chances of a slip or fall.
