Re: Division 66 - SSI CLIP US Profitability Study

---

## I. Executive Summary

### A. Introduction -

The CLIP Program is an admitted program that provides General Liability coverage for local chapters of recognized non-profit civic, social or professional organizations comprised of community and social groups. Examples include Optimists Club, Professional Photographers Association, etc. The CLIP Program also provides Inland Marine coverage for specified property owned by members of the organizations listed above.

Last year's analysis resulted in an overall PY 2015 Ultimate Loss Ratio indication of 42.3% which yielded a RAP neutral rate need of -34.8% based on **2014 RAP values**.

The year to date rate change for 2015 is **-1.7%** for all lines of business.

### B. Summary of Results

IL and LAE evaluated as of: 4<sup>th</sup> Quarter 2014  
Currency Employed: USD

#### Exhibit 1:

\* Includes PY 2015 rate change achieved

\*\* Assumes a tax rate of 35%

## I. Discussion of Material Findings- The results for this program have remained in line with the previous year's profit study and all three lines of business continue to remain profitable on a RAP breakeven basis. Note that this program does not have an AAL load but there are losses associated with modeled CATs (exhibit 2). This is due to the nature of the program where the insured property(s) is not situated in one location. There has been no significant activity in the Excess line since program inception.

## II. Assumptions/Limitations/Data Quality/Other

- A. Assumptions - For purposes of this analysis, the loss ratio indications are based on a 3.5% trend assumption for GL, 4% for AL, 5% for XS and 0.0% for Property and APD.
- B. Limitations/Weakness - The projected PY 2015 loss ratio shown in Exhibit 1 of this report assumes that the YTD rate change achieved in 2015 will be consistent throughout the remainder of the year. To the extent that the annual rate change does not equal the YTD rate change, then the results of this report will vary. Besides that, there are no significant limitations/weaknesses with regards to this study outside of standard actuarial caveats that normally apply to projecting future losses. These include, but are not limited to, actual emerged actuarial parameters (LDF's, ILFs, ELR's, trend, etc.) not being in line with selected parameters; miss-coding/inaccurate representation of the data relied upon in this analysis; and future regulatory/judicial changes affecting the frequency/severity of the results.

Data Quality - The data for all lines of business in this analysis is pulled from Sandbox which aggregates the data from CRS.

- C. Other -NA

## III. Methodology

A review of several claim diagnostics shows no clear evidence of case reserve strengthening for this book of business (no consistent increase in average outstanding or decrease in paid to incurred ratios). In addition, a review of implied claim disposal rate does not show any clear evidence of claims closure rate changes.

Several methodologies have been used to project loss & legal expenses to ultimate. This includes the following: paid and incurred loss development and Bornhuetter-Ferguson methods (on a paid and incurred basis) all for losses uncapped and at varying capped levels. Frequency and severity is employed along with ultimate ILAE ratio selections to select a final PY 2015 ultimate loss ratio. The selected frequency and severities are somewhat consistent in comparison to the prior profit study.

The commissions and underwriting expenses are program specific. The RAP neutral ratio is calculated based program specific RAP profit loads. Rate need is based on a ratio of the ultimate ILAE ratio and the target ILAE ratio.

## IV. Actuarial Next Steps

- We will continue to monitor these results through quarterly actual versus expected analyses.

## V. Underwriting Action Plans

Below is the response provided by H. Warren from an email dated 03/25/2015.

This program has been with us for 15 years and is profitable. We have lost some production due to the change in personnel at this PA's office. We are working extremely hard with the new management team to address issues with respect to marketing and helping them grow the program. We will be performing an audit in April and will spend time to review coverage and rates and determine how to attract new associations. Overall the program has performed well and we would like to help them increase production this year.

## **Appendix - Methodology:**

Please note that the analysis has three sections:

- Section I - General Liability
- Section III - Property
- Section V - Excess

Exhibit 1 - Summarizes PY 2015 ultimate ILAE ratios and PY 2015 rate need.

Exhibit 2 - PY reported incurred and paid loss and LAE ratios in triangle format.

Exhibit 3 - Indexing PY 2004 - 2014 ultimate ILAE (incurred + LAE) ratios to PY 2015 and selection of PY 2015 ultimate ILAE ratios.

Exhibit 4 - Frequency/Severity method used to calculate an indicated PY 2015 ultimate ILAE ratio

Exhibit 5 - Summarizes various methods (Exhibit 6a - Exhibit 8f) used to calculate ultimate + LAE & ratios for PY's 2004 - 2014.
